# Nemanja Antonijevic

Frontend Developer

0611441507 | antonijevicnemanjaa@gmail.com | Serbia

## Summary

Certified Frontend Developer, over two years of experience (Self-employed). I have experience in building modern and scalable web applications.

## EXPERIENCES

### Frontend Devlepoer                                                  2023 - 2025

Self-Employed, Remote

- Working as a freelancer, I had the opportunity to create dozens of websites and applications, according to client requests. I worked on smaller and more complex applications. The biggest challenge was a blog platform with 50-100 active users, which has advanced functionalities such as: groups, admin dash, auth, etc...

## Education

### Frontend Developer                                                  2023 - 2024

ITAcademy, Belgrade

- A one-year client-side JavaScript programming course, where I learned the basics of the web, HTML, CSS, and advanced JavaScript concepts.

## Languages

Serbian          C2
English          B2

## Skills

, Programming Lanugages (JavaScript, TypeScript) , Frameworks & Libraries (React.js, Redux, Next.js, Astro, Express.js, Firebase, Node.js, TailwindCSS) , Version Control (Git, GitHub) , Soft Skills (Problem Solving, Communication, Time Management) , CSS3 & HTML5

## Projects

- SIMIA (Social-Blog)
- https://github.com/Nemanja0033/simia

SIMA is a platform for sharing political views and opinions, I developed it for my client's needs. It currently serves 50-100 active users, enables user login, admin dash, activity tracking, group creation, etc. The technologies I used are: React, Firebase, TypeScript, TailwindCSS, Node.js

- Shopzzila (E-Commerce)
- https://github.com/Nemanja0033/shopzzila-e-commerce

Web application for selling products, has a landing page, advanced product filtering, dynamic overview of each product, cart. Built with React.js, TypeScript, TailwindCSS, Material UI, Daisy UI

- Ortodox App
- https://github.com/Nemanja0033/ortodox-app

The free-to-use application for viewing the calendar of the Orthodox Church, for every day of the year, has an advanced search by days, by holidays, by fast days. Built with Express.js on the server and React.js on the client, TailwindCSS styling components.
